

Krautkrämer CL Go+

January 2024

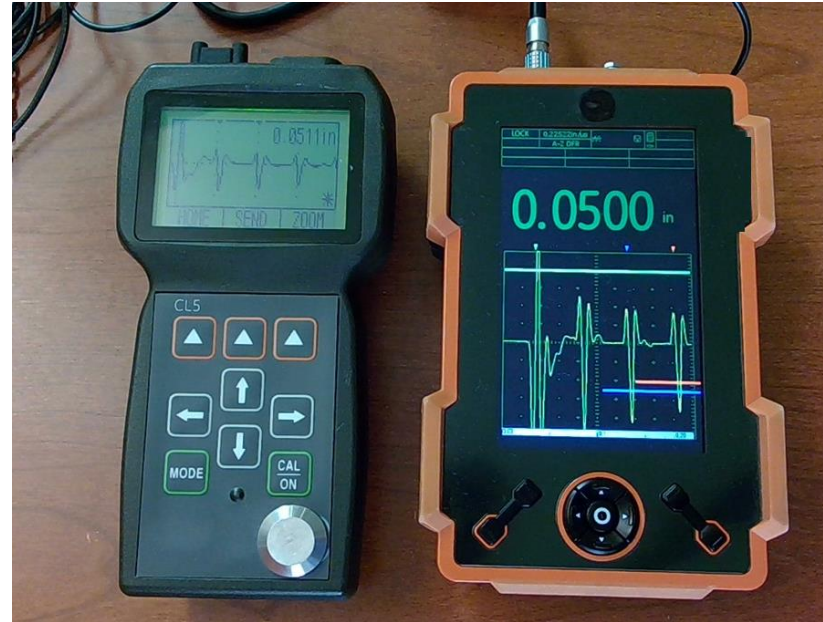

Value propositions

Next-level **user experience**

CL Go+ raises the bar for precision gauges, featuring a large, crisp and bright display, and ergonomic light weight design, all encased in a rugged housing to withstand the toughest industrial conditions.

ERGONOMIC

Light weight and large screen

- 5" crisp & clear display offers excellent indoor and outdoor visibility
- Large readouts eliminates eye strain
- Excellent screen to body ratio
- Light weight (850g) and single hand operation

Next-level **user experience**

CL Go+ raises the bar for precision gauges, featuring a large, crisp and bright display, and ergonomic light weight design, all encased in a rugged housing to withstand the toughest industrial conditions.

ERGONOMIC

Light weight and large screen

- Flip functionality: Ambidextrous design enables operation with left or right hand

Next-level **user experience**

CL Go+ raises the bar for precision gauges, featuring a large, crisp and bright display, and ergonomic light weight design, all encased in a rugged housing to withstand the toughest industrial conditions.

ERGONOMIC

Light weight and large screen

- Integrated zero Block for quick calibrations

CL Go+ raises the bar for precision gauges, featuring a large, crisp and bright display, and ergonomic light weight design, all encased in a rugged housing to withstand the toughest industrial conditions.

ROBUST

Suited for a variety of
challenging environments

- IP 67 rated
- MIL 510 tested

Effortless inspections

Experience the power of simplicity with CL Go+, where advanced inspection capabilities meet effortless navigation.

Intuitive navigation

Five-way switch pad and quick function keys for easy navigation

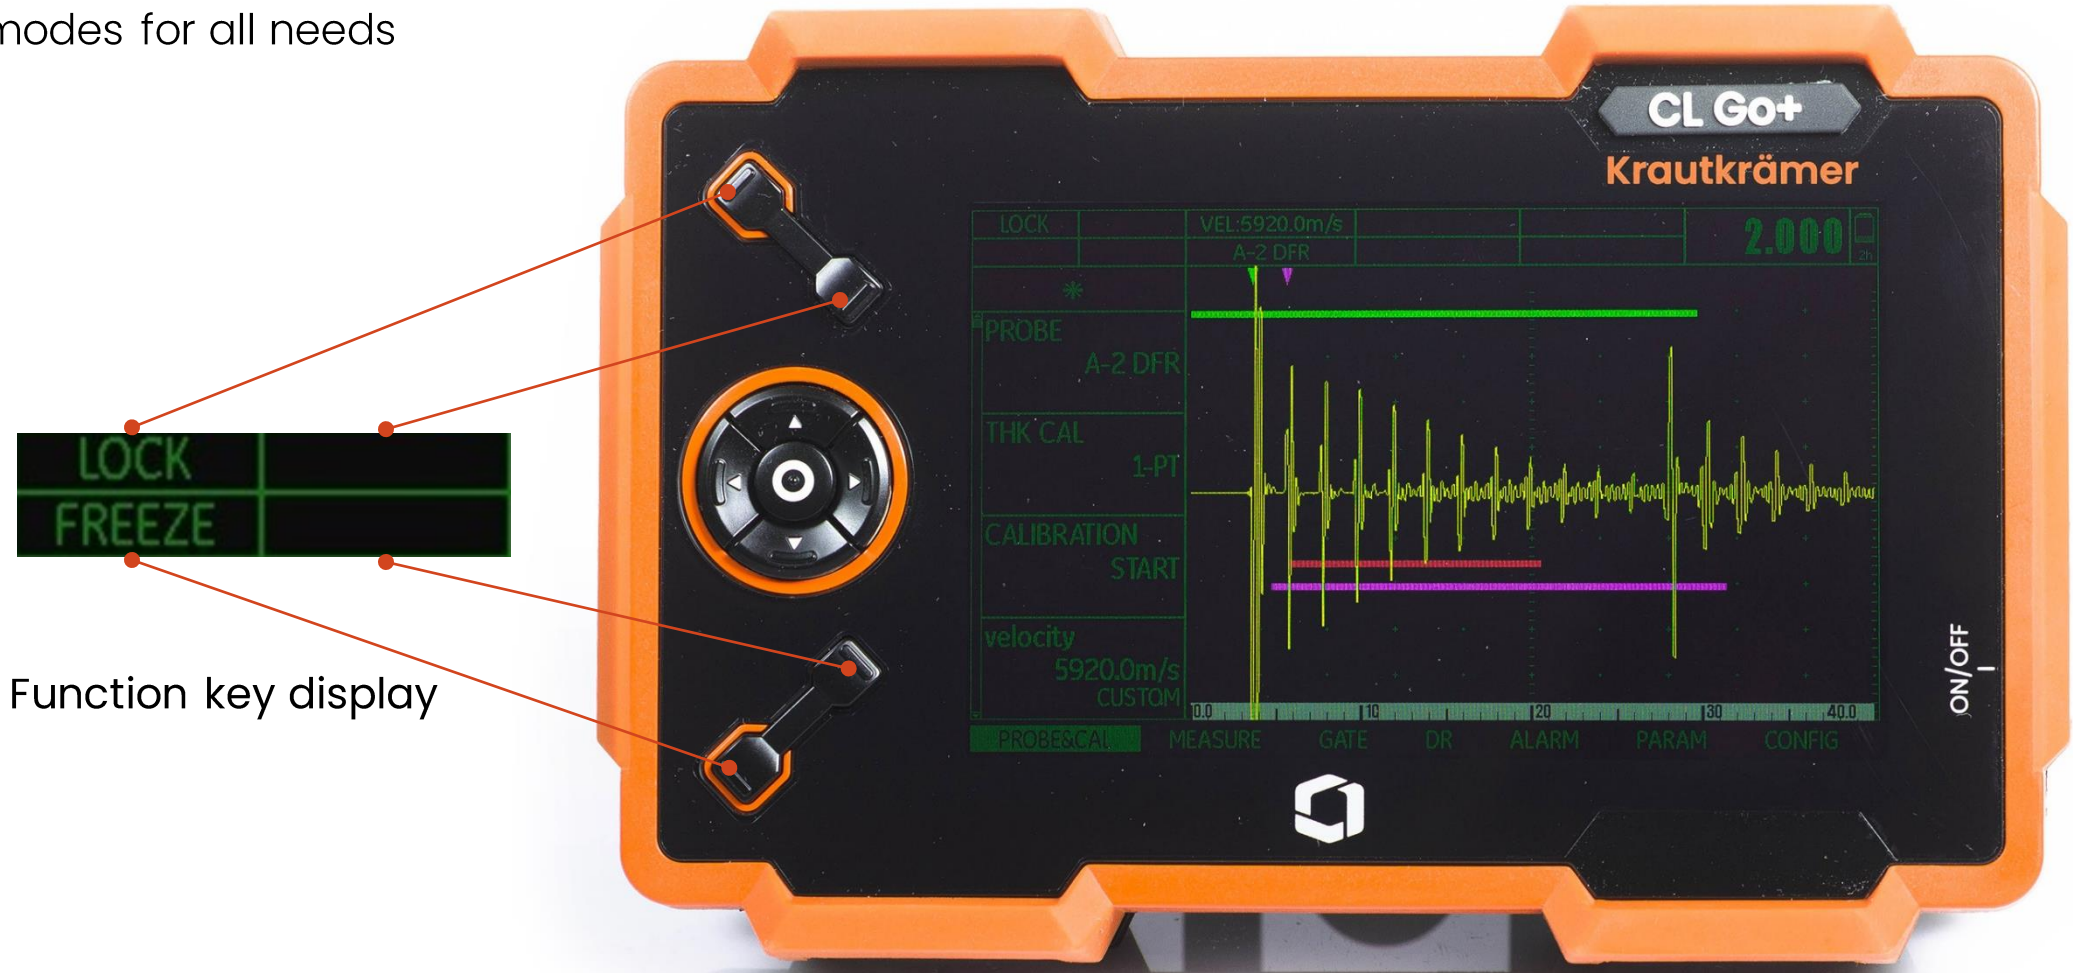

Quick function keys enable actions in a single click.

Five-way switch pad makes navigation a breeze.

Confidence in each measurement

CL Go+ redefines confidence in quality control by offering unrivaled precision, stability and repeatability with every measurement.

PRECISION

Get the most accurate measurements

Precision measurements (0.001 mm)*, up to:

- 0,16mm thickness in steel
- 0,13mm thickness in plastic

**under ideal conditions*

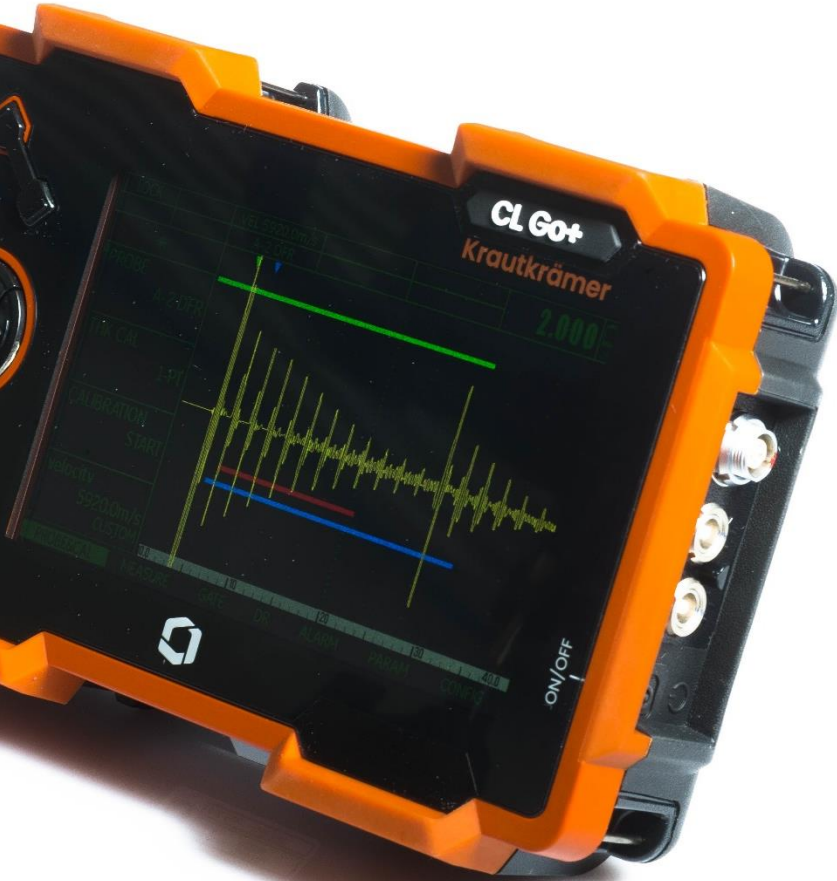

RELIABILITY

Measurements that you can rely on

- Finite impulse response up-sampling combined with interpolated zero-cross measurement technique for improved measurement stability and reliability.
- Automatic gain control for better repeatability.

Empowering you with clarity

CL Go+ offers a robust data recorder capable of capturing an extensive amount of data sets that can be seamlessly transferred to PC for versatile analysis.

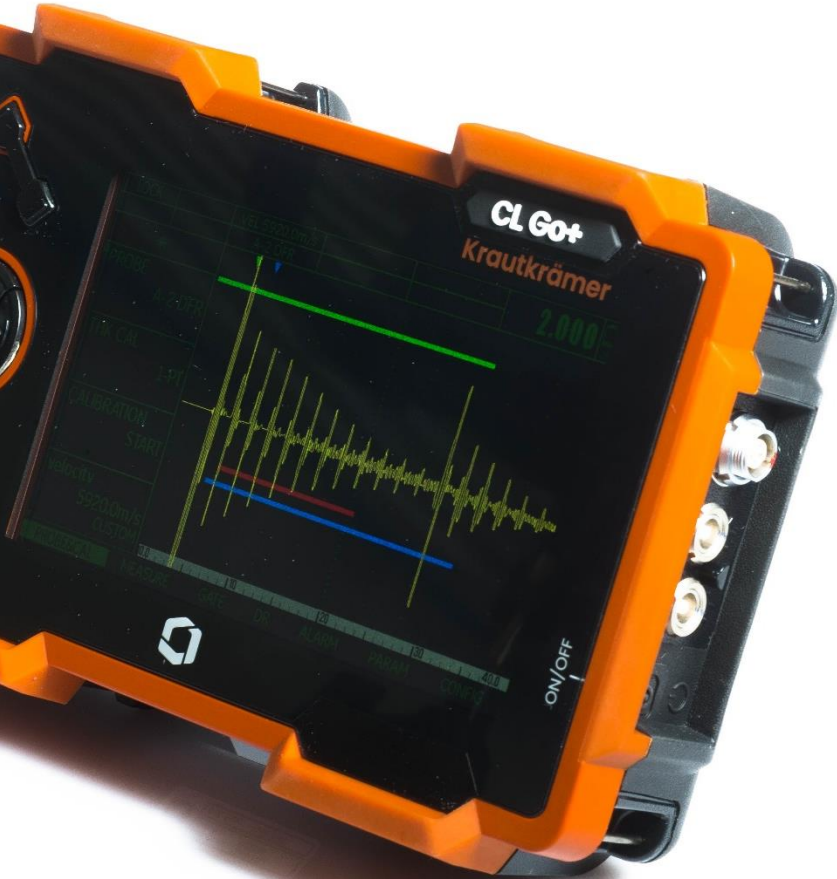

Powerful data recording

Data recorder of CL Go+ can record large amount of data and organize it in multiple ways

- Can record up to 100000 points per file
- Micro grid records additional information to the measurement location
- A/B Scan attachment to data points ensure integrity of data collection

Empowering you with clarity

CL Go+ offers a robust data recorder capable of capturing an extensive amount of data sets that can be seamlessly transferred to PC for versatile analysis.

Easy data sharing

Recorded measurements can be easily transferred to PC for in-depth analysis

- Recorded data can be quickly exported as CSV, XML, or DAT files
- Advanced data analysis through Ultramate

Bridging expertise gaps

CL Go+ bridges expertise gaps with its dual-mode functionality, featuring Inspector mode for novices and Expert mode for more seasoned professionals, ensuring effective use across all skill levels.

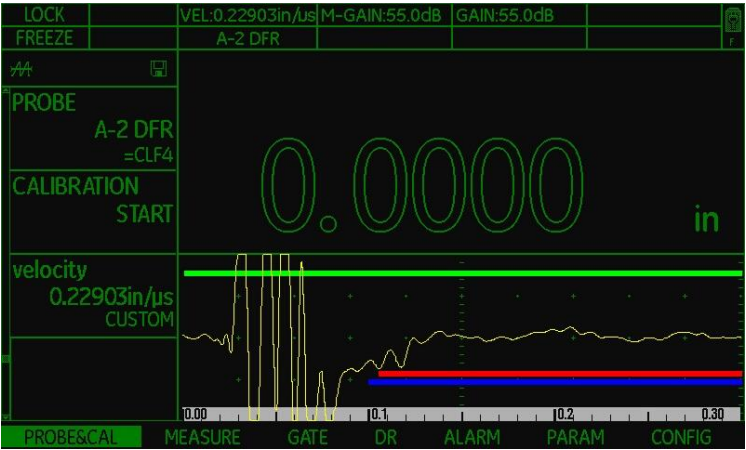

Bridging expertise gaps

CL Go+ bridges expertise gaps with its dual-mode functionality, featuring Inspector mode for novices and Expert mode for more seasoned professionals, ensuring effective use across all skill levels.

Inspector mode

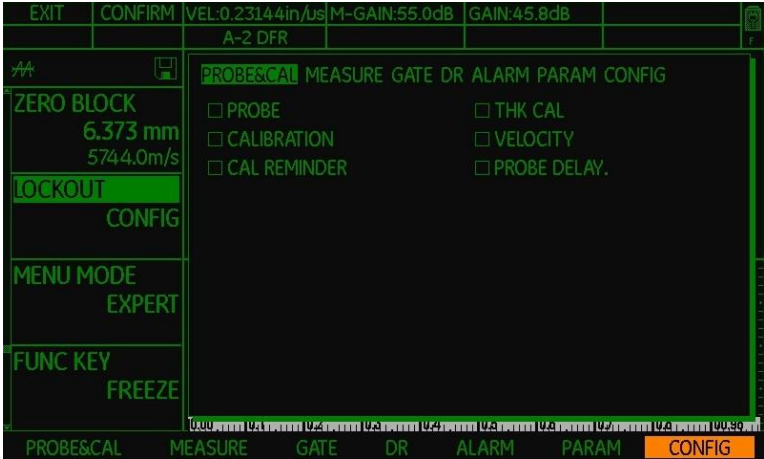

A measurement in just three steps:

“Pick a probe → calibrate → ready to measure”

Expert mode

Powerful, customizable setups for most demanding applications
